

**December 2017**

**November 2018**

MOAGIUDGL ΣΟΤΡ

**II LEVEL MASTER IN  
GASTROINTESTINAL  
SURGICAL ONCOLOGY**

ΣΟΚΕΙΣΤΕ ΟΜΚΟΓΟΕΛ

**Director: Prof. M DEGIULI**

**Special guest: Prof. WJ HYUNG**

**Yonsei University, Seoul - Korea**

YONSEI UNIVERSITY, SEOUL - KOREA

Università degli Studi di Torino

Dipartimento di Oncologia

Παιδιατρικό Ογκολογικό

**Theory  
sessions**

Anatomy of gastrointestinal tract  
 Integrated endoscopic approach at gastric and colorectal cancer  
 Traditional, laparoscopic and robotic approach at colorectal cancer  
 Traditional, laparoscopic and robotic approach at gastric cancer  
 Complications in mininvasive surgery  
 Oncological guidelines in gastrointestinal cancer: up to date

**Practical  
sessions**

Live sessions of open, laparoscopic and robotic surgery  
 of gastrointestinal cancer

**Stages**

Yonsei University, Seoul - Sud Korea  
 Tutor: Prof. Wu Jin HYUNG

Molinette Città della Salute - Turin  
 Tutor: Prof Mario MORINO

Santa Croce e Carle Hospital - Cuneo  
 Tutor: Dott Felice BORGHI

Sant' Andrea Hospital - La Spezia  
 Tutor: Dott Stefano BERTI

San Raffaele Hospital - Milan  
 Tutor: Prof. Riccardo ROSATI

Misericordia Hospital - Grosseto  
 Tutor: Dott. Pietro Paolo BIANCHI

AOU Careggi Hospital - Florence  
 Tutor: Dott. Andrea CORATTI

Humanitas Research Hospital, Rozzano - Milan  
 Tutor: Prof. REPICI

Cadaver-Lab, ICLO Teaching Center - Verona  
 Tutor: Prof. Maurizio DEGIULI

### Topics of the Master, Knowledge of :

Surgical anatomy, lymphatic drainage and major anatomical variants of the gastrointestinal tract

Main mechanisms of pathogenesis of neoplastic gastrointestinal diseases

Experimental surgery and preclinical research (the role of PDXs)

Current endoscopic and radiological procedures for the diagnosis and management of early and advanced gastrointestinal cancers

Main surgical techniques for the management of gastrointestinal tumors

Update international guidelines of GI diseases

Latest minimally invasive (laparoscopic and robotic) technologies, specific devices and their application in clinical practice

Diagnosis and management of perioperative complications

Flowchart of diagnostic and therapeutic planning

The role of multidisciplinary treatment

Current preoperative treatments in GI cancers

### Structure of the Master

Theory and practice at San Luigi  
University Hospital

1500 hours , 1 year - 60 CFU  
8 Surgeons (3 residents)

Registration fees 4.000 €

**5 weeks of international stages**  
**Partecipazione at national Congress**  
**Partecipazione at Cadaver-Lab**

### Inclusions characteristics

Graduated in General Surgery  
Graduated in Abdominal Surgery

Dear Colleagues,

We are pleased to announce the **1th II Level Master in Gastrointestinal Surgical Oncology**, which will be held at the San Luigi University Hospital (SLUH), Orbassano (Torino) from **December 2017 to November 2018**.

Gastric and colorectal carcinoma represent the two major gastrointestinal tumors in our Surgical Department. Surgical approach to these disease, in addiction with pre- and postoperative therapy, is the only treatment with curative intent.

Aim of this Master is to provide a current and complete overview of this oncological curative pathway and of experimental surgery and preclinical research, with particular attention to the latest generation of standard open, endoscopic, and mininvasive (laparoscopic and robotic) surgical techniques.

Surgeons will have the opportunity to attend the ORs in national and international high-profile reference centers such as Turin, Florence, Grosseto, Cuneo, La Spezia, Milan HSR and Seoul Yonsei University. This master will also give all partecipants the chance to partecipate into a practical experience of anatomical and surgical dissection at the Cadaver-Lab in Verona.

We hope you will join us in Orbassano to live these unique surgical opportunity.
